## DIMORPHOTHECA NAMAKWALANDSE MADELIEFIE PASTEL SHADES

The name *Dimorphotheca* originates from the Greek word "Dimorphis," which means "in two forms". The plant produces two completely different seeds, one flat and oval, the other round and "worm-like". Both seeds are viable and perform with the same result. This pack could contain the flat oval, the "worm" type or both types of seed.
