50g / m<sup>2</sup> – 4 x PER YEAR / JAAR

**GROUND-COVER WONDERLAWN (Dichondra)**  
Plants with small, round to kidney shaped leaves forming a dense, low growing ground-cover. Ideal for areas which cannot be mowed, such as between stepping stones.

Despite this container serving to prolong the life of the seed, it should not be exposed to unduly high temperatures. Once the container has been torn open, deterioration of the seed will ensue at the usual rate.
