

Biososome™

ECO-MATCHED INDIGENOUS GRASS SEED MIXES

SHORT GROWING GRASS COVER MIX

- Short growing grass species only
- Low maintenance
- Enhances soil ecology
- Beautiful natural aesthetic

The cost of keeping grassy areas well maintained and aesthetically pleasing continues to rise. MayFord, through our Biososome™ Range has the solution for you.

BIOSOSOME'S SHORT GROWING GRASS COVER MIX

This is a self-sustaining indigenous and naturalised grass seed mix which benefits the ecosystem through soil condition improvement and ecological enrichment of degraded environments.

- Suitable for all regions across South Africa
- Variety of carefully selected, highly productive grasses that thrive in all climatic conditions
- Saves you time, money and effort

WHY BIOSOSOME™?

- Beautiful aesthetic for landscaping applications
- Highly effective perennial cover crop for orchards
- Adapts easily to ambient conditions
- Environmentally friendly
- No irrigation or fertiliser required
- Very resilient and stress tolerant

FEATURES

- Short growing species
- Thrives in harsh climates
- Excellent ground coverage
- Restores soil ecological health
- Loves sunny, shaded & partially shaded areas
- Combats erosion & reduces surface water runoff

THE RESULT

A cost effective, low maintenance landscaping solution for grassed areas requiring an aesthetically pleasing, natural look.

MayFord

SUITED FOR A RANGE OF APPLICATIONS

COVER CROPS

- Perennial cover crop – ideal for no / minimal till operations
- Boosts organic content in the soil
- Provides an ideal environment for microbes
- Supports and promotes natural nutrient cycling
- Habitat for pollinators & pest predators
- No legumes or cruciferae which tend to attract or host pests and diseases

LANDSCAPING

- Brings a feel of 'manicured wilderness' to a landscape
- Natural aesthetic that breaks monotonous shapes and colours
- Perfect for borders, margins and out-of-play areas of golf courses
- Encourages the influx of wild flowers, forbs and shrubs typical of a healthy ecosystem.
- Thrives in sunny, shaded & partially shaded areas
- Combats erosion & reduces surface water runoff
